Better Fuel Efficiency

3L Patrol Boost fitting:

Monitoring your boost pressures, by making sure they are at the correct levels, will help keep your vehicle running longer. For customers with a Nissan GU Patrol 3.0L, we recommend getting the boost feed from the factory intercooler piping which provides an accurate boost pressure reading. We at TaipanXP provide a cost effective solution, in providing an intercooler elbow which already has a 1/8 BSP (common fitting for boost gauge) boost fitting tig welded in.

We also provide this as an exchange product, ie if you send us back your original pipework we will refund **part** of the purchase price.

TaipanXP – Unit 6 2-10 Rudman Pde, Burleigh Heads QLD 4220
